OLYMPIC Hi-Lo WET TABLE™

Spring Glen Veterinary Hospital
Renton, WA
Melinda Cumming, DVM

“We have been very pleased with the Olympic Wet Table and would recommend it to anyone as both a dental table and as a wet treatment table. The ability to raise and lower the table has greatly improved the comfort of our technicians. The unit is attractive, and the mechanism to raise and lower the table is quiet and does not seem to disturb any of the patients on or around the table. The pedal requires very little pressure to engage so adjustments can be easily made without taking attention away from a task. The exterior surface is easy to clean. With the split grates, the grates themselves are easy to remove to clean as well as to retrieve items that may fall to the bed. Another innovation is the addition of electrical outlets to the base of the table, which substantially relieves the pressure on the wall outlets.”

We really like the table – it is more than just functional. It is versatile and provides a much better working environment for the medical staff. On the whole, this is an extremely useful dental/wet table and we are very glad to have it.”
