Dura Saver Floor Mats

Revolutionize your kennel, clinic or barn!

Our new Dura Saver plastic floor mats are impermeable and fully capable of disinfection. Unlike traditional rubber mats that harbor bacteria and reintroduce disease, the high density plastic mats can be completely cleaned and disinfected using your current cleaners. The Dura Saver mat is easy to work with due to the rigid and lightweight material.

Dura Saver Floor Mats have a diamond pattern that allows for traction. They weigh only two pounds per square foot.

Available in a stock size of 4’ x 8’, but can be custom ordered in sizes up to 8’ x 12’. They can be easily cut with a circular saw for on-site customization.
