**STANDARD WIDTH**

**Overall benefits:** For almost seven decades, Shor-Line cages have been the calling card of quality. The best value comes from designing in standard cage sizes, but we do make custom cages. Our cages are made in 6’ increments, starting with 18” x 18”W. All cages are 28¾”D.

- 18”W
- 24”W
- 30”W
- 36”W
- 42”W
- 48”W
- 60”W
- 72”W

**STANDARD HEIGHT**

- 18”H
- 24”H
- 30”H
- 36”H

**LATCH**

1. **Standard Latch**
   Sound-dampening latch of durable stainless steel. Can open easily with one hand.

2. **Silent Latch Mechanism**
   This bar latch was developed for a near-silent close to reduce stress for cats. Same secure close only quieter.
### OPTIONS

1. **Double Door**
   - The removable middle post makes it easy to slide in a recombinant patient. Comes in widths of 48, 60 and 72" and heights of 30 and 36". Optional divider available to make into two smaller cages. (Double door and divider shown at left.)

2. **End and Top Panels**
   - Top and end panels are the same high-quality stainless steel used in the cage bank.
   
   **Note:** The standard cage comes without top and side panels. Customers who don’t inset the cages in a wall add top and side panels to give a finished look.

3. **Oxygen Cage Door**
   - Almost any cage can become an O₂ cage with the addition of an O₂ door.

### PLATFORM

1. **Stationary**
   - Raises bottom cages for easy cleaning underneath. Adjustable feet allow you to accommodate most floor variations. Standard height is 8".

2. **Mobile**
   - Raises the cages bank 8½" off the floor and locking casters make the bank moveable. These are large, reinforced-nylon casters with polyurethane wheels that will not mar floors. Rotates 360 degrees.

3. **None**
