A NEW WAY OF PILOTING ULTRASOUND SCANNER.

Obviously, the new EXAPAD make themselves accessible to all. The streamlined interface provides every user with a simple and completely intuitive use of the ultrasound scanner. The new applications, EchoTouch and EchoVoice optimize the ergonomics and make of them handy ultrasound scanners.

A HIGH RESOLUTION TOUCHSCREEN.

Unequalled robustness for such a quality of imaging, working time of more than two hours, exceptional lightweight and handling make of the EXAPAD high end portable scanners capable of answering the demands of today and tomorrow veterinarians. Patient files, reports, annotations, specific measurements, are all adapted to veterinarians.

EXAPad

Echotouch

Touch screen

Thanks to the new interface system EchoTouch, only the necessary functions are present on the screen, making the work of the user faster and more efficient. The advanced settings remain of simple access as well.

Echovoice

Voice command

The embedded software, EchoVoice gives you a voice control over the main functions of the scanner, allowing you to work with a complete autonomy, even when you are further away from the device.

Echopad

Remote control access

Thanks to the application EchoPad installed on your Ipad, you have access to a second command board for your EXAPAD, it is then possible to pilot your ultrasound scanner remotely. Your own presents, saved in your Ipad, can be used in the EXAPAD.
